Your customer now sees all the course sections matching the search. Courses and schedules are clearly evident and ready for the registrant to select for more details. Remember, this is live. No downloads or uploads are required.

If Program Group search is enabled, this list would match the Program Group and your customer would also see a description of the program along with an optional ability to display a link to an online or PDF application or brochure posted on your web server.

See the status column? XenDirect automatically determines the status based on options you set, even waiting lists if you desire. You can also display free courses and restrict display of specific courses to only show for certain customers.

The **Featured Course** section is a user defined option providing you the ability to highlight one or more course sections as we have done here. It is easy to change, so you could modify the Featured Course list weekly. As you review the details of each Featured Course, make sure to read the Featured Course details for some unique features.

Your customers can search for courses by various search fields as you see below. Most of these options can be enabled or disabled by you as desire. Go ahead and try various searches. From the next page, just click the **Search Courses** menu option to return back to this page.

The **Keyword** field searches course codes, titles, descriptions, and instructor names. Or you can select a group of related courses using the Program Search list. By the way, this text area is also user defined so you can enter the text you desire here.

As you advance to the search results page, notice the special courses in the Featured section. These are a few examples of courses that will demonstrate some specific features. Note however you will not yet be able to add courses to your cart. At this time, you are viewing courses anonymously. Once we are ready to add courses to the cart, you will create a new account.

Welcome to the XenDirect Web Registration Self Guided Tour.

This **Web** Registration module is fully functional with a live connection to our XenDirect demonstration site. This is what your customers will use to register for courses. However, this is not the module you and your staff use to enter and manage data. You will use the XenDirect Admin Module for those purposes. After you have completed this self guided tour, contact Xenegrade Corp for a demo of the Admin Module.

First, this is a demonstration site. Your site will look different. Since you control most of the colors, banners, photos, links, text, and features available, your site will be branded to fit your organization. In fact, the instructional text area you are reading now is defined by you, and almost every page has its own instructional column as well.

Let's start a search and register for one or more courses. When the time comes, we will provide you with a test credit card number to enter for processing.
